

Regulation on the Complaints Procedure

Preamble

iMMO contributes to the protection of human rights, especially by making medical assessments of suspected victims of torture and inhumane treatment and the transfer of expertise thereof. This is done especially in the context of a procedure for asylum seekers.

iMMO uses free lance professionals – especially physicians and psychologists – who have the required knowledge and expertise, who commit themselves on a voluntary basis and who are not bound to iMMO by an employment contract. The relationship between iMMO and these professionals distinguishes itself by permanence, shared vision and mutual respect. Assessors are trained by iMMO and, within the procedures, formats and protocols of iMMO, perform assessments working independently within the framework of their professional responsibility and report their findings to iMMO.

iMMO is a fiduciary institution, high demands are made with regard to its integrity and confidentiality. In iMMO sensitive information about persons is exchanged, revelation of which could cause damage to iMMO and the parties concerned. iMMO intends to distinguish itself primarily by the objective professionalism of its judgment and judging process.

Because of quality assurance and improvement a low-level and simple procedure for dealing with complaints is required. This regulation is meant to provide this. The complaints procedure aims to address the complainer correctly give him/her satisfaction if deemed appropriate and offer iMMO an opportunity to learn from shortcomings.

The complaints procedure does not see on matters of cooperation within the organization of iMMO, for instance between assessors and secretariat or amongst associates. For this the usual management channels are available under responsibility of the chief executive. This regulation furthermore does not intend to provide a general appeal facility with regard to advice and judgment given by iMMO concerning assessed persons.
